

BRENAU WELLNESS PROGRAM

Brenau's Wellness Program, funded by Cigna, is designed to support healthy behavior in the workplace and to improve health outcomes. Our program includes activities during the year which relate to being "healthy," whether it be physical, mental, financial, community, or emotional health. **Employees receive points for each activity or program in which they participate.** Those points are added to the **Activity Tracker**, maintained by HR, and are used to determine recipients for periodic special prizes. During the Open Enrollment meeting in November, names will be drawn from those who have accumulated Activity Tracker points; the more points you accumulate, the greater chance you have of winning a **cash prize**. Employees can check how many points they have by following this path: ADP > Resources > Company Information > Forms Library > Wellness Participation Activity Tracker.
